Object: recommendation letter for Akshay Anand

Sir,

I am Assistant professor at Pprime Institute, a CNRS laboratory, where I realize experimental researches on convective heat transfer. I also teach, at ISAE-ENSMA, convective and radiative heat transfer and statistical physic.

During "Turbulence Heat Transfer" lecture I used to teach since 2016, I was able to realize large scientific qualities of Akshay Anand. He is a very brilliant student, motivated, independent and has a huge intellectual curiosity. He obtain 16/20 as score at THT test, and that was one of the best student I had.

Thus, I recommend very strongly Akshay Anand to realize his PhD in your lab.

Gildas Lalizel

A handwritten signature in black ink, appearing to read "Gildas Lalizel", with a long horizontal stroke extending to the right.
